

WE'VE PERFECTED THE PROCESS OF **COMMERCIALIZING NEUROTECHNOLOGY**

Your breakthrough could change the world of neuroscience forever and we want to help. We're passionate about bringing to life the vision of clinicians, researchers and entrepreneurs and have helped dozens of products successfully reach the market.

SensoMedical can be your trusted partner in bringing your idea to from proof-of-concept to viable product. We are a team of cross-trained experts who specialize in efficiently lowering the time to market, cost and risk for neuroproduct development.

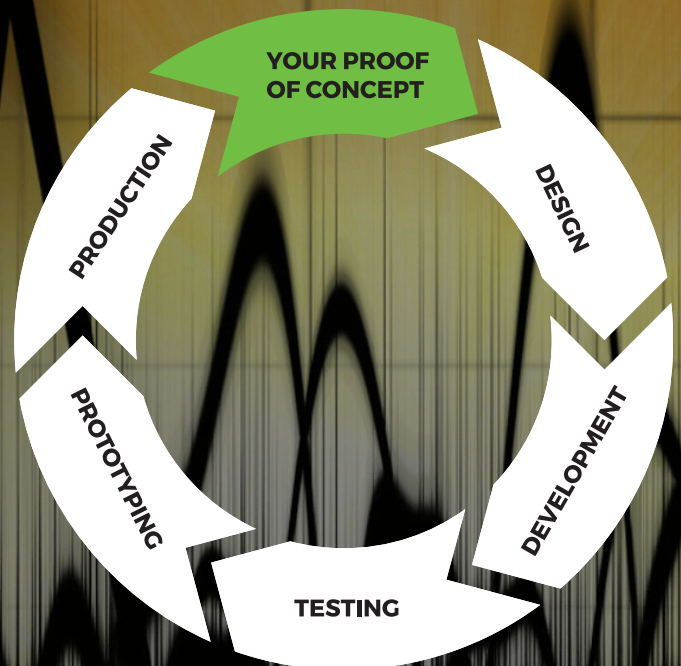

Where neuroproducts become reality

OUR PROCESS

We act as your hands-on product technology and development team. Each project is led by a seasoned neuroproduct development expert.

We will:

- Define the scope of the project to answer real world application needs
- Assess and determine the right technology requirements and constraints for your project
- Mitigate project technological and regulatory risks
- Manage product development
- Develop and execute verification and validation plans

ABOUT US

Developing devices in the neurotechnology space is a complex endeavor that requires expertise in multiple scientific fields.

SensoMedical is one of the only service providers in the world that specializes in neurotech. The company's unique capability is based on in-depth collective knowledge in the fields of neurology, neurosurgery, electrophysiology,

Neuro-technology, EEG, EMG, implanted electrodes, cranial and DBS applications, neurostimulation, electronics, software programming, mechanics, materials science, and physics. With our partner network of production facilities, SensoMedical services as a one-stop shop for R&D and manufacturing services for all applications in neurotechnology.

EXPERTISE

Neurotechnology

Wearables

Electrophysiology

Neurostimulation

Customized Electrodes

EEG/EMG

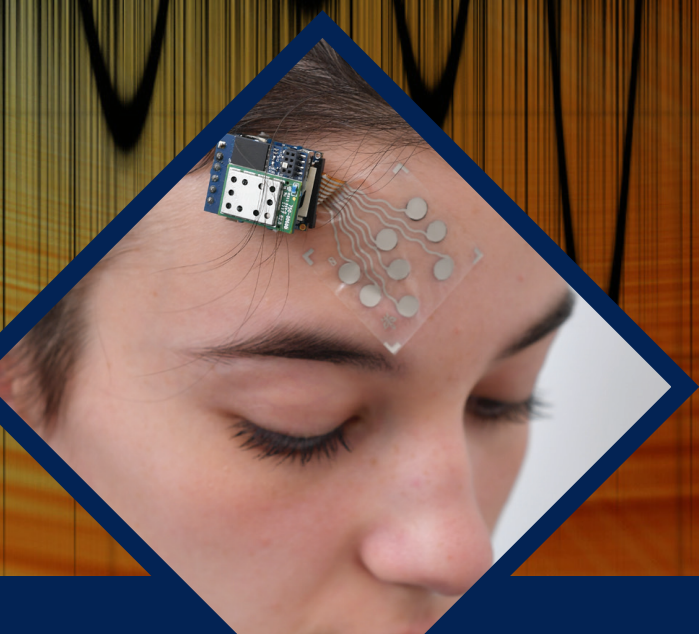

Active Implants

Full Service: We bring you end-to-end neuroscience product management and manufacturing services all under one roof.

Speed to market: Avoid having to manage multiple vendors and get to market quicker with a dedicated development team and regulated supply chain, helping you shorten your product delivery times and avoid long-term burn-rate.

Profits: Get to market faster and with higher margins by choosing the right components and manufacturing process.

Validation: Quickly understand what it will take to bring your neuroproduct to market profitably without patient complications or undue risk..

WE'RE LOOKING FORWARD TO HEARING ABOUT YOUR PROJECT
